Logistics (I expect for a December 12-13 meeting in the DC area) are still being finalized. Yes, it is accurate that any recommendations and advice for revisions will be developed through this and other meetings and discussions, and no decisions on them have yet been made.

Best,

Hi Tony:

As you no doubt know, EPA has now posted this publicly: https://cfpub.epa.gov/si/si_public_record_report.cfm?Lab=NC&dirEntryId=341593

My understanding is that the Chartered CASAC plans to meet some time in mid-December, but I just wanted to check with you on whether that's accurate and, if so, whether a specific date/location has been selected.

Also, to go back to an earlier exchange, is it still accurate to say that you have not decided whether any revisions to the PM standards are warranted at this point?

Thanks,
Sean
